

#### Relationship from customers to tickets:

One and only one customer can be associated with a purchase of one or many tickets. Not zero or many tickets because, to be considered a customer of the Rangers59 Movie Theater, a person must have purchased at least one ticket.

#### Relationship from tickets to movies:

One and only one ticket to one and only one movie.

Each one ticket that is purchased is only valid for one and only one movie.

#### Relationship from customers to concessions:

One and only one customer to zero or many concessions

One and only one customer because there is only one customer\_id per order.

Zero or many concessions because people don't have to buy concessions at the Rangers59 Movie Theater in order to see a movie. Customers who do purchase from concessions could purchase once or multiple separate times.
